Complete used font from Englands' Stephenson-Blake Foundry. Includes diphthongs, ligatures and other specials.

Near new with much of the type uninked.

This font is very heavy on lowercase and very light on caps and figures, please inspect carefully. If you already have Tudor from Stephenson-Blake, this would be an outstanding augmentation font. DA0120

ANTIQUE 2-COLOR ELECTROTYPED ORNAMENTAL INITIALS

Complete alphabet in each color, plus 17 duplicates.

Good clean condition without noticeable wear or corrosion.

Age and source of these initials are unknown, but likely dating to the 19th century. Size is 4-line or approximately 48 point. The eleven extra pieces consist of 7 paired characters and 3 singles. All pieces are copper electro on stereotype metal, mounted on a wood block. At least some and possibly all of the blocks have been drilled out and liquid type metal poured into the bore; this gives added strength. Base form electros are glued onto the block (no room for nails) and the color elements are nailed on. Looks like these were done by a professional electrotyping company. The face is an oldstyle semi-rugged roman, possibly hand-drawn, very close to Plymouth. No proof has been taken; there will likely be slight variations in height which may require individual makeready. DA0123
