## ATF RANSOM SHADED INITIALS, 36PT

### READ NOTE BELOW

Ransom Shaded Initials were produced by American Type Founders in sizes 12 through 48 point and are shown in their 1942 catalog. We are offering two (2) complete sets of this 36 point size, each with some additional duplicates. Both sets include the two font ornaments and a pair of the matching brackets as originally furnished. A few types have been saw-trimmed for closer fit.

Please note that the letters X and Z were not made for Ransom Initials. Yeah, that's dumb—take it up with ATF!

**Set No. 1** Complete set of 24 letters, plus 27 duplicates. Weight 4.1 lbs. **If the In Stock quantity above shows 2, this is the font you will get.**

**Set No. 2** Complete set of 24 letters, plus 14 duplicates. Weight 3.1 lbs. **If the In Stock quantity above shows 1, this is the font you will get.**

## TUDOR BLACK, 18PT

Complete used font from Englands' Stephenson-Blake Foundry. Includes diphthongs, ligatures and other specials.

Near new with much of the type uninked.

This font is very heavy on lowercase and very light on caps and figures, please inspect carefully. If you already have Tudor from Stephenson-Blake, this would be an outstanding augmentation font. DA0120

## MISCELLANEOUS OLD BORDERS #22

From American Type Founders. See note below.

Here we have two antique 12 point single-element borders. They are designated Inland Borders No. 1227 and 1228, and shown in the 1912 catalog of American Type Founders, page 1057. Either can be used independently or they can be chromatically combined. Quantity of the first is about 300 running picas, and of the other, somewhat more. The majority of each has 3 elements ganged on a 36pt body for easier composition, and a generous supply of single elements on 12pt em as well. DAGC03

## ANTIQUE 2-COLOR ELECTROTPED ORNAMENTAL INITIALS

Complete alphabet in each color, plus 17 duplicates.

Good clean condition without noticeable wear or corrosion.

Age and source of these initials are unknown, but likely dating to the 19th century. Size is 4-line or approximately 48 point. The eleven extra pieces consist of 7 paired characters and 3 singles. All pieces are copper electro on stereotype metal, mounted on a wood block. At least some and possibly all of the blocks have been drilled out and liquid type metal poured into the bore; this gives added strength. Base form electros are glued onto the block (no room for nails) and the color elements are nailed on. Looks like these were done by a professional electrotyping company. The face is an oldstyle semi-rugged roman, possibly hand-drawn, very close to Plymouth. No proof has been taken; there will likely be slight variations in height which may require individual makeready. DA0123

## INLAND CONDENSED GOTHIC NO. 1, 72PT

Complete used font from Inland Type Foundry, St. Louis.

This historic 17-pound font is in remarkably good condition for being so old. It bears the pinmark of Inland, which was absorbed into American Type Founders in 1911. The face is shown in their 1907 specimen book. Descenders and cap Q are kerned which indicates the matrices were cut before the standard point system was adopted in the late 19th century. Type is darkened and blotchy with age and ink but not very worn; it was rescued in 1989 from an old hot-metal shop in the bad part of north St. Louis and has been resting in a galley ever since. Ready to serve for another 100+ years. DA0107

[Yes I know the lowercase b and d are swapped. The apprentice did it, that's my story and I'm stickin' to it.]
